REMARKS: climatological normal rainfall and temperature- 30-year average (1991-2020)
Rainfall total was normal. Average maximum temperature was above normal, with the 2013 daily high record broken. Average minimum was slightly below normal. Trough systems were dominant for most of the month which resulted in flooding and landslides in some areas on the $6^{\text {th }}$ and $14^{\text {th }}$. One death occurred as a result of landslides on the $6^{\text {th }}$. Dust haze reported on a few days. Thunderstorms reported on 3 days.
