REMARKS: Climatological normal -30-year average (1991-2020)

[^0]
[^0]:    Rainfall total was higher than normal. Daytime highs were as warm was usual while night-time lows were cooler than usual. The Atlantic highpressure system was the dominant feature resulting in breezy days. A mid to upper level trough supported the daily maximum rainfall on the $21^{\text {st }}$. There was one thunderstorm day.
